

## Network Security & Availability

Network security is essential in today's ever-changing IT World. As technology moves forward, so does the rate of exploits and abuse of that technology. With security incidents on the rise – nearly doubling every year – now, more than ever, it is essential to focus on network security.

A comprehensive Network Security solution may include consideration for Secure Remote Access, Password Management, Data Loss Prevention, End Point Controls, Encryption, Intrusion Prevention, Penetration Testing, Anti-Virus, Content Security, Network Monitoring, Application Control, Security Events Correlation, Cloud Security, Disaster Recovery, Policy Development and general patching and maintenance. In addition to stopping the threats, IT, HR, and Legal departments may need to gather the appropriate reporting and demonstrate an audit trail to prove security measures are in place for the peace-of-mind of their clients and employees and to avoid legal liability.

eDrivium offers comprehensive solutions to meet your specific needs and compliance requirements on budget.

- Offer flexible, customized financing options

Specializing in networking and security, eDrivium is unlike other IT consulting firms. Our work ethic and strategy-oriented culture demands that we see the entire business picture. We aim for long-term impact rather than short term fixes and work towards building long-lasting partnerships.

With in-depth expertise and hands-on experience managing complex projects for companies around the globe, eDrivium provides a commitment to excellence in handling a wide range of critical network challenges.

### Our Services

- Network Security
- Networking and cabling
- Remote and On-site technical support and managed service
- Collaborative Technologies
- Network Availability
- Other Specialized Services

Canadian businesses rely on eDrivium for their IT needs. We help our customers meet critical technology issues as they adapt to the ever-changing digital economy. Customer satisfaction is our top priority and we consistently exceed our customer's expectations.

The eDrivium process of information gathering, documentation generation and providing recommendations minimizes financial output while ensuring that your network has a solid foundation and ongoing support structured to meet your specific business requirements.

### 3D Promise

- Design
- Deploy
- Document

Whatever the deadline, whatever the hour, we deliver IT solutions that allow your organization to maintain a competitive advantage in today's ever-changing business environment.
