

## eDrivium Secure RMM (eSRMM or eSRMM+)

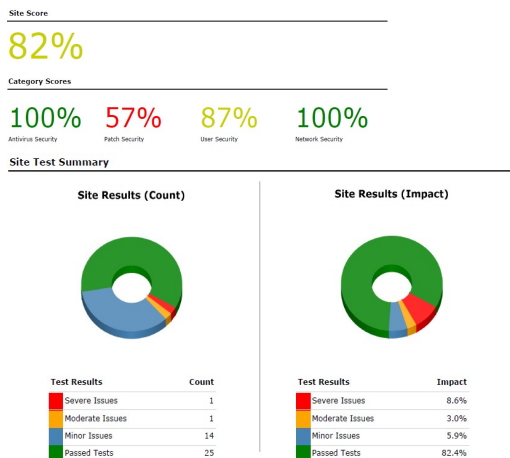

In the ever evolving world of IT, it's now critical more than ever to have a firm grasp on your internal infrastructure so you can fix issues easily and quickly while at the same time gaining visibility into your security posture with a quick security score! Use this score to help you pass your insurance audit!

eDrivium Secure RMM (eSRMM) has been designed to make your job easier than ever by consolidating products with remote monitoring and management to provide a seamless solution to manage everything IT related with an abundance of detailed reports to give you full insight into your network and security!

### Reactive eDrivium Secure RMM:

#### INSTANT VISIBILITY - SECURITY SCORE

Comprehensive reports to give you full insight including a handy security score!

#### REDUCE CLICKS TO RESOLUTION

One page repository to view/edit all device details

#### SINGLE PANE OF GLASS VISIBILITY

Monitoring, Alerting, Patch Management

#### EASILY MANAGE ALL DEVICES

From servers to laptops, network devices and your cloud infrastructure

#### SIMPLE AND RELIANT REMOTE ACCESS

With built-in premium remote control tools

#### SECURITY-CENTRIC SNMP MONITORING

Realtime polling, monitoring, hardware performance, syslog data and SNMP support

### Proactive eDrivium Secure RMM+

#### GET ALL THE BENEFITS OF OUR REACTIVE SERVICE+

Including your Security Score plus get a Proactive review of reports and patch management with eDrivium technicians available to respond and remediate.

#### CLOUD / EXTERNAL SERVERS & SERVICES

Our cloud engine can externally monitor all aspects of your Internet-facing infrastructure:

- Ping latency and availability
- Port compliance on inbound ports
- DNS resolution with response times
- HTTP GET and POST requests for website and external system monitoring
- Email monitoring of sent and received emails to verify the health of email servers

#### ROCK-SOLID AUTOMATION

Set all scripts and scheduled actions to run at a set time with reliable records of all actions for compliance and auditing. Automate common tasks and remediate simple alerts with 200+ pre built scripts

#### WINDOWS PATCHING

Automate patching across all supported versions of Windows. Detailed patch reporting to help you identify non-compliant endpoints. Manual acquiring, testing and applying patches available as an add-on service
